FAX (801) 596-1826

October 9, 1993

Note: This is a condensed synopsis of a complete resume. Please call Mr. Ellsworth or refer to the complete resume to answer additional questions.

Overview

Mr. Ellsworth has built a strong background in Software Engineering, Object Oriented Methodologies and Business Management. During the last nine years of managing BusiWare Mr. Joseph Ellsworth has developed the ability to work in almost any environment and still get the job done.

Communications

Communications and negotiation skills are some of Mr. Ellsworths valuable traits. He has developed these skills over ten years of sales during which time he was responsible for marketing not only the services but also the idea and it's business advantages to prospective clients.

Analysis & Design

Mr. Ellsworth has parlayed his communication expertise into an excellent analysis and design ability. He analyzed many different businesses operating in a wide variety of industries. He wrote high level design documentation describing the particular needs of those businesses. These documents also described how to meet those needs with computerized solutions.

Implementation

Mr. Ellsworth has traditionally implemented many of the systems he has sold, analyzed and designed. He is proficient in many languages but prefers C++ and Smalltalk. Mr. Ellsworth has programmed for thousands of hours in both C++ and Smalltalk. He also has substantial experience in Pascal, Basic, FORTRAN and DBASE. Popular 4GL environments are another area of expertise with his favorite being Clarion and Progress.

Deployment & Training

Deployment of applications involves many skills but often the most important is the ability to train people who have never seen or used a computer to use one efficiently. In some instances it involves training knowledgeable users. Each training session is tailored to the knowledge and ability of the user being trained. Mr. Ellsworth is particularly adept in this area and can effectively interact with people running the gamut from neophyte to guru.

Skill Acquisition & Education (C++, Smalltalk)

Mr. Ellsworth attended college at Weber State during the early 1980s. His skills in Object Oriented Analysis, Object Oriented Design and Object Oriented Implementation using C++ and Smalltalk are the result of extensive private study and field experience. Mr. Ellsworth is competent in relational design and deployment, which includes a strong knowledge of many 4GL environments. Progress executing under UNIX is his favorite. Mr. Ellsworth has programmed under various operating systems including many esoteric ones. His preferences are: UNIX, MS-DOS/Windows and OS/2.

Dependable and Responsive

Performing as a private consultant Mr. Ellsworth accepted the primary responsibility for many projects. The result of this is that Mr. Ellsworth has developed the ability to side step obstacles and solve problems to get projects completed. Mr. Ellsworth adheres to "The Buck Stops Here" principle. Mr. Ellsworth's combination of this attitude and competence make him an ideal candidate for a Project Manager.

Compatibility as a Team Member

Working as a team member is an assignment that Mr. Ellsworth enjoys. He prefers to work as either a Project Manager or Section Leader but works equally well as a normal team member. Mr. Ellsworth's negotiation skills and his ability to clarify statements and requirements make him invaluable as an inter-group coordinator.
